

Techniques for Assuring Vitality of the Supply Chain CQSDI Special Topic

Stan Adachi, Director, Supplier Quality and Process Management, Boeing Defense, Space and Security
Michael Galluzzi, Supply Chain Manager, NASA, Exploration Systems Mission Directorate
Buck Crenshaw, Technical Expert, Honeywell Technology Solutions Inc., NASA Contract Assurance Services

Conference on Quality in the Space and Defense Industries
March 16, 2010

Stan Adachi

Industry Controlled Other Party (ICOP) Supplier Certification and Oversight

Abstract:

Stan Adachi's topic is Strengthening Other Party Quality Management System Certification Processes.

He will cover the recent efforts both within the Aerospace Industry and Boeing to strengthen the Industry Controlled other Party (ICOP) Quality Management System (QMS) processes to improve auditor skill sets, assessment criteria and rigors, and certification body oversight.

Stan Adachi

Industry Controlled Other Party (ICOP) Supplier Certification and Oversight

Stan will discuss how Boeing relies on the the following relationships and techniques to assure the vitality of their supply chain:

- IAQG – International Aerospace Quality Group
- IAQG Other Party Management Team
- Industry's Call for Action
- Boeing Oversight activities that compliment the ICOP scheme

Michael Galluzzi

The Role of a Network Centric Supplier City and Regional Clusters

Abstract:

Mike Galluzzi will discuss the Role of a Network Centric Supplier City and Regional Industrial Clusters, unlocking commercial competitiveness for a viable industrial base and it's impact on the vitality of the supply chain.

Michael Galluzzi

The Role of a Network Centric Supplier City and Regional Clusters

- NASA Industrial Base is facing grave challenges**
- NASA influence over the Aerospace Industry limited**
- NASA visibility into complex supply chains indistinct**

Buck Crenshaw

How NASA is Mitigating Risk in the Supply Chain

- Recent impacts on NASA's supply chain
- Perceptions of 3rd Party Registration
- Organizations, Tools and Techniques used to compensate for these perceptions and changes:
 - The Joint Audit Planning Committee
 - The NASA Audit Management Team
 - The use of OASIS
 - The use of SAARIS
 - Our participation in the RMC
- Changes under development
 - Our Participation in Supplemental Oversight Expanded Supplier Outreach effort

Assuring the Vitality of the supply Chain

Where:

- The Jamaica

When:

- Right after this introduction at 1:45 PM

Why:

- To hear what we are doing to address this subject
- To share what you have done
