

ASQ Inspection Division Webinar

17020- Inspection, Documentation and Training

This webinar session will inform attendees of the benefits of ISO/IEC 17020:2012 Accreditation within the Inspection Community. We will explore the process for Implementation / Accreditation. We will review the types of documentation that often cause issues for Inspection bodies seeking Accreditation. We will discuss typical training, and the benefits for an Inspection-driven organization.

The Discussion:

- Discuss the Assessment Process, and the differences between Laboratory and Inspection Body Accreditation.
- The growth of 17025 Accreditation in the past ten years, and the potential for 17020 Accreditation to Leapfrog that in the next ten years.
- Failure and successes will be discussed, along with tactics for a successful program.

Presenter: David Feist

Accreditation Manager, ISO/IEC 17020, Dimensional and Testing ANSI-ASQ National Accreditation Board (ANAB)

David is an accomplished Quality Professional, experienced in multiple disciplines of International Business, manufacturing, process mapping, organizational effectiveness, Emergency management planning for business continuity, Six Sigma Quality Improvement Methodologies and Total Quality Management and software development. He is the former owner of China Sourcing, Inc, an Asia-Pacific manufacturer of Industrial Products sold throughout US industry with over 20 years of experience in Project Management and large-scale project implementation. He is a consultant in Laboratory Systems (Environmental, Water Quality, Destructive and Dimensional) on manufacturing, international product teams, software validation and Project Management. Mr. Feist established and ran 13 testing laboratories globally, guiding them through the ISO/IEC 17025 registration process. He has conducted over 95 accreditation assessments to the ISO 17025:2005 standard, including 10 DoD ELAP assessments. He has been technical witness to qualify 3 environmental (NELAP) assessors for Environmental Laboratory Accreditation. He has lead multiple training classes for private clients, qualifying them for Internal Assessment of Laboratories, and Inspection Bodies. He currently serves on the T-A-G (Technical Advisory Group) as a Technical Lead for ANAB with oversight for both their ISO 17025 and ISO 17020 accreditation processes
