ASQ's Standards Central

Stay up to date on standards-related news and activities by visiting ASQ's Standards Central. Find what's new, what's important, and what's "hot" in the world of standards, Ask the Experts, and more.

To learn more about ASQ's Standards Central, visit asq.org/standards today.

Welcome to the 2013 ASQ Standards Catalog

The staff of ASQ is pleased to present its latest Standards Catalog, featuring our complete portfolio of quality standards, as well as a wide selection of other standards-related products available from ASQ.

Browse the catalog here in its hard copy, or search our selection of standards online at asq.org/quality-press. Look no further than ASQ as your one-stop quality information resource.

Why are standards important? What is their value to my company?

Standards are important to every company and their bottom line—in fact, standards and conformity assessment activities are linked to all facets of your business.

Companies that are the most successful in their markets recognize standards and conformance as business tools that should be managed right alongside their quality, safety, intellectual property, and environmental policies. In addition, standardization and conformity assessment activities lead to lower costs by reducing redundancy, minimizing errors, and reducing time to market.

Demonstrating compliance to standards helps your products, services, and personnel to cross borders, ensuring that products manufactured in one country can be sold and used in another.

Why should my company get involved in standards development?

Companies that participate in standards development activities reduce costs, increase efficiencies, facilitate and maintain market access, and gain a more competitive advantage than those that do not participate. When your business participates in standards-setting activities, you are bringing your concerns and needs to bear on the process. You have two choices: Position your organization to take a seat at the table and be part of the standards-setting process, or let your competitors dictate the way you will be doing business.

Why standards from ASQ?

ASQ's role in the area of standards is to administer technical advisory groups (TAGs). ASQ administers the U.S. TAGs that develop the most popular standards—ISO 9001, ISO 26000, and ISO 14001.

- The ASQ family of companies also includes accreditation leaders ANSI-ASQ National Accreditation Board, ANAB-ACLASS, and RABQSA. They assess and accredit certification bodies, personal competency certificates, and international standards. RABQSA (www.rabqsa.com) designs, develops, and delivers personnel and training certification services to meet various industry needs.
- Jointly owned by ASQ and the American National Standards Institute (ANSI), ANAB (www.anab.org) assesses and accredits certification bodies that demonstrate the competence to audit and certify organizations conforming to management systems standards. ACLASS (www.aiclasscorp.com) provides accreditation to international standards.

ISO 9000 Series

The ISO 9000 family of international quality management standards and guidelines has earned a global reputation as the basis for establishing quality management systems. ISO 9001 specifies requirements for a quality management system for any organization that needs to demonstrate its ability to consistently provide products that meet customer and applicable regulatory requirements and aims to enhance customer satisfaction. The standards are used for certification/registration and contractual purposes by organizations seeking recognition of their quality management system.

ANSI/ISO/ASQ Q9001-2008 Quality management systems— Requirements

This standard replaces ANSI/ISO/ASQ 9001:2000. It specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements and aims to enhance customer satisfaction through the effective application of the system, including processes for continual improvement of the system and the assurance of conformity to customer and applicable statutory and regulatory requirements.

A Global Family of Standards

ASQ and its family of companies play a vital role in the development of international standards.

ASQ's role in the area of standards is to administer technical advisory groups (TAGs). ASQ administers the U.S. TAGs that develop the most popular standards—ISO 9001, ISO 26000, and ISO 14001.

The ASQ family of companies also includes accreditation leaders ANSI-ASQ National Accreditation Board, ANAB-ACCLASS, and RABQSA. They assess and accredit certification bodies, personal competency certificates, and international standards.

- RABQSA designs, develops, and delivers personnel and training certification services to meet various industry needs.
- ANAB assesses and accredits certification bodies that demonstrate the competence to audit and certify organizations conforming to management systems standards.
- ACLASS provides accreditation to international standards.

You may also join online at www.asq.org or by calling ASQ Customer Care at USA and Canada: **800-248-1946** Mexico: **001-800-514-1564** All other locations: **+1-414-272-8575**

New memberships are effective upon receipt of payment. New members receive one year of membership from the date they join. Members are billed prior to the anniversary date of their membership for next year's dues. Memberships, even those paid by employers, are nontransferable. All prices are subject to change. In becoming an ASQ member, you have the duty to follow the ASQ Code of Ethics and Society governing documents.

Which one of the following best describes your title?

- | | | | | |
|--|--------------------------------------|-------------------------------------|---------------------------------------|---|
| <input type="checkbox"/> Accountant | <input type="checkbox"/> Contractor | <input type="checkbox"/> Inspector | <input type="checkbox"/> Professor | <input type="checkbox"/> Student |
| <input type="checkbox"/> Administrator | <input type="checkbox"/> Controller/ | <input type="checkbox"/> Instructor | <input type="checkbox"/> Programmer | <input type="checkbox"/> Superintendent |
| <input type="checkbox"/> Advisor | <input type="checkbox"/> Comptroller | <input type="checkbox"/> Machinist | <input type="checkbox"/> Retired | <input type="checkbox"/> Teacher |
| <input type="checkbox"/> Analyst | <input type="checkbox"/> Coordinator | <input type="checkbox"/> Manager | <input type="checkbox"/> Scientist | <input type="checkbox"/> Technician |
| <input type="checkbox"/> Associate | <input type="checkbox"/> Director | <input type="checkbox"/> Mechanic | <input type="checkbox"/> Six Sigma | <input type="checkbox"/> Unemployed |
| <input type="checkbox"/> Auditor | <input type="checkbox"/> Engineer | <input type="checkbox"/> Nurse | <input type="checkbox"/> Black Belt | <input type="checkbox"/> Other |

Assist in the Development of Standards

ASQ develops and maintains standards as an American National Standards Institute (ANSI)-accredited standards developing organization (SDO). Our technical committees help develop international standards for both International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC). Your expertise is needed in the development and maintenance of national and international standards.

Join one of ASQ's Technical Advisory Groups (TAGs) supporting the development of standards by visiting asq.org/standards.

License the Standards Your Team Needs!

A network site license from ASQ is the perfect solution for organizations that need to have standards information at multiple users' fingertips—even at multiple locations. Pricing is determined by the standard and the number of users with access to the documents.

Benefits include:

- Convenient access and a central location for documents.
- Instant access for your team(s).
- Dedicated support from ASQ headquarters.

To learn more about site licenses for standards, visit ASQ's Standards Central at asq.org/quality-press/e-standards or send an e-mail to cs@asq.org.
